

Legacy **z**XP

Increase the performance and reduce the operational costs
for your zSeries platform

**Is your MAINFRAME
costing you too much?**

 **Legacy**

SOFTWARE SOLUTIONS

There are many ways to reduce the amount of MIPS, starting from code remodelling to environmental tuning. zXP is in a class of its own, no need to modify any application, simply install the zXP software and see the transaction performance increase.

With extra performance comes a reduction in CPU usage, which is a major cost saver. Better transaction throughput will reduce your overall MIPS consumption and based on your IBM MLC licensing agreement, so too will your monthly licensing cost. Furthermore, increasing performance will ultimately defer your hardware upgrade spend by a few years, depending on your annual growth.

Are you running out of CPU capacity?

Product Benefits

Reduced zOS
Monthly Licensing Costs

Online transaction performance
increase by up to 70%

Easy product
installation

No IPL or major system
configuration

Ability to switch
transactions on/off
on the fly

Administration via IMS
console

zOS and COBOL IMS,
NATURAL and HOGAN
compatible

No modification
to transaction or
runtime code

Performance Stats

During testing, zXP has indicated exceptional performance statistics, with some transactions showing as much as 70% decrease in CPU usage. These statistics are a good indication that our 30% saving is merely a minimum indication

The table indicates the average CPU in milliseconds on a test transaction. zXP was switched on at 09:12 and then off at 11:58

Do you need extra performance?

Up to 50% increase

How does Legacy zXP work

No need to IPL the system, Legacy zXP is that easy to install. No additional COBOL, Natural nor HOGAN configurations or modifications.

With minimal effort a new region is created using our well documented installation guides. Once completed, simply redirect the existing transaction to the new Region with minimal configuration and let Legacy zXP do the rest.

The transaction can be switch ON or OFF via the administration console, allowing on the fly configuration and recycling of regions. Never before has such a performance tool been so easy to install and administer.

Cost Saving

An estimated minimum 30% saving on online transactions

The graph below is a simple representation of the estimated 30% saving a customer may experience after installing Legacy zXP. These savings are not only monetary but performance based too. Your LOB applications and end users will instantly see quicker response times.

Annual Costs

C R14.23 Million

Z R9.96 Million

ROI

Z 2 Months - Year on Year

Z 10 Months - Cost Savings

TCO

Z R10.59 Million Spend

Z R3.64 Million Saving

Estimated 30% savings monthly
